

R.I.S.E. AIDA LANDING PAGE

Mockup + Gated Content Questions

A developer-ready visual concept that attracts clients and new recruits, builds desire through the R.I.S.E. framework, and converts them through personalised scorecards.

Prepared for web design, copywriting, CRM automation and implementation.

**One system. Two entry paths.
One personalised next step.**

The one-page AIDA conversion flow

Every screen has one job: capture attention, deepen relevance, build belief, or move the visitor into gated content.

Sticky CTA throughout: TAKE THE FREE R.I.S.E. SCORECARD | Secondary CTA: EXPLORE THE AGENCY OPPORTUNITY

Screen 1 - Attention: problem, promise and two routes

The visitor immediately understands the outcome, the R.I.S.E. idea and the next action.

ATTENTION

NLP pattern

Pace the visitor's stress, then reframe the issue as sequence - not personal failure.

CTA rule

Client and recruit choices are visible without competing with the scorecard.

Developer

Open the relevant scorecard modal from hero CTAs. Preserve UTM and route tags.

Screen 2 - Interest: identify the missing step

Interactive problem cards let visitors recognise themselves before they meet the full framework.

INTEREST

Interaction

Each card expands to show the related R.I.S.E. step and a tailored quiz CTA.

Copy pattern

Mirror the visitor's selected problem in the next heading and quiz introduction.

Data

Set hidden priority tag from selected card.

Screen 3 - Interest: the fresh R.I.S.E. pyramid

The signature visual explains sequence without overwhelming the visitor with product language.

INTEREST

Visual rule

Animate layers on scroll. Keep labels large and readable on mobile.

Meaning

The pyramid is the intellectual product; financial services sit behind the steps.

CTA

Clicking a level starts the relevant scorecard branch.

Screen 4 - Desire: choose a path with confidence

The page now shifts from education to the outcomes each audience wants.

DESIRE

Future pace

Show realistic outcomes: clarity, skill development and a plan - not guaranteed returns or income.

Choice

Let visitors self-select without hiding the difference between advice and recruitment.

Route

Every CTA sets the correct quiz and result CTA.

Screen 5 - Desire: founder, proof and objection removal

Trust is built before the contact gate. All claims and testimonials remain placeholders until verified.

DESIRE

Trust order

Founder story →
evidence →
objection
handling →
scorecard gate.

Proof rule

Never invent client
numbers, awards,
media logos or
career outcomes.

FAQ

Answer pressure, suitability
and expectations before the
form.

Screen 6 - Action: make the gated content feel valuable

The scorecard is positioned as a personalised diagnostic, not a generic downloadable PDF.

R.I.S.E. FINANCIAL HEALTH SCORECARD

Your score.
Your missing letter.
Your next 30 days.

FREE PERSONALISED RESOURCE

See what needs to R.I.S.E. next.

In about 3 minutes, receive:

- ✓ Your strongest and weakest R.I.S.E. area
- ✓ Three practical actions for the next 30 days
- ✓ A downloadable result and optional conversation

Get your personalised result

You will see your result immediately after submitting.

ACTION

Gate timing

Ask questions first. Gate the full result, not the start of the quiz.

Value

State the exact deliverable, time required and immediate access.

Consent

Unchecked, specific and readable. Store consent timestamp.

Four key interface states

Use one question per screen, visible progress and a result that feels more valuable than the form felt costly.

1

Developer rule: preserve answers when users move back, refresh or switch from desktop to mobile where technically feasible.

Mobile-first layout and interaction

Most social traffic will arrive on mobile. Stack copy before visuals and keep one primary CTA continuously available.

Question

Result

The complete lead journey

The gate sits after value-building questions and before the full personalised result.

Progressive profiling: ask only the minimum before the result. Collect optional role, location and preferred contact time after value has been delivered.

Client: R.I.S.E. Financial Health Scorecard

Use the same 0-3 answer scale for every question: 0 Not in place | 1 Starting | 2 Mostly in place | 3 Strong and reviewed.

R RESTORE	I INCOME	S SUSTAIN	E EMPIRE
1 Emergency savings can cover essential expenses.	1 Income has a realistic growth plan.	1 Saving or investing happens consistently.	1 Nominees, will or estate arrangements are understood.
2 Protection needs are understood and recently reviewed.	2 There is a backup or second-income strategy.	2 Investments match goals, time horizon and risk comfort.	2 Family can locate key financial information.
3 High-interest debt and monthly cashflow have a clear plan.	3 Skills are being developed to increase earning capacity.	3 Progress is reviewed at least every six months.	3 A long-term legacy, leadership or continuity plan exists.

Educational diagnostic only. It is not a suitability assessment, financial recommendation or guarantee of outcomes.

Recruit: R.I.S.E. Career Growth Scorecard

Use the same 0-3 answer scale. A low readiness score triggers education and expectation-setting, not aggressive recruitment.

R READINESS	I INCOME SKILLS	S SUSTAINABILITY	E EMPIRE POTENTIAL
1 I can manage a learning period without relying on instant income.	1 I am open to performance-based income.	1 I can follow a weekly activity plan consistently.	1 I want to help other people grow.
2 I understand that licensing, effort and compliance are required.	2 I am willing to learn communication, prospecting and service.	2 I respond constructively to coaching and feedback.	2 I am interested in leadership and team systems.
3 My current financial commitments are visible and manageable.	3 I want a path where income can grow with skill and contribution.	3 I prefer long-term skill-building over quick-win hype.	3 I want to build impact beyond my own personal production.

The scorecard is a conversation starter, not an employment decision. Career previews must explain role expectations, licensing, costs and variable compensation clearly.

Routing, context and contact fields

Keep scoring questions separate from lead qualification. Use optional context to personalise the result and follow-up.

1. Routing question

What needs to R.I.S.E. next?

- My finances and family protection
- My income or career
- My leadership and team systems

2. Optional context questions

- What is your biggest goal for the next 12 months?
- Which challenge feels most urgent?
- When would you like to make progress?
 - Just learning
 - Within 30 days
 - This week
- Preferred conversation: protection, debt, investing, career or leadership

3. Required contact gate

- First name
- Email address
- WhatsApp number
- Path selected (hidden or visible)
- Consent checkbox

Optional after result

- Current role
- State / city
- Preferred contact time
- Booking details

Consent microcopy

"I agree to receive my personalised R.I.S.E. result and relevant follow-up by email or WhatsApp. I can unsubscribe at any time."

Add links to Privacy Policy and Terms.

Do not ask before value

Avoid collecting identity numbers, salary, policy numbers, medical details, bank information or unnecessary sensitive data inside the scorecard.

Progressive profiling rule: minimum details before result; richer qualification only after the visitor receives value.

How answers become a personalised result

Each R.I.S.E. category contains three questions. Sum 0-9, then normalise to 0-100.

0-33

NEEDS ATTENTION

Start with education and one stabilising action.

34-66

DEVELOPING

A foundation exists, but the next step needs structure.

67-100

STRONG

Maintain, review and connect this strength to the next stage.

1

Primary result

The lowest normalised category becomes the likely missing letter.

2

Tie-break

Use selected goal, urgency and chosen path to select the first recommendation.

3

Client route

Restore low → education / clarity review. Sustain low → investing education. Empire low → legacy checklist.

4

Recruit safety

Readiness low → readiness checklist and nurture; do not push a career booking.

5

Intent

High intent + consent → assign a human follow-up task. Low intent → deliver content and nurture.

6

Relevance

Only show CTAs relevant to the visitor's declared path and result.

Use developmental labels. Never describe a visitor as broke, bad, unfit or a guaranteed fit for a financial product or career.

What the visitor receives and what the system stores

The result page should deliver immediate value, then offer one relevant optional next action.

Result page modules

1. Overall R.I.S.E. score
2. Strongest letter
3. Missing letter / next priority
4. Plain-English meaning
5. Three 30-day actions
6. Mistakes to pause or review
7. Downloadable five-page result PDF
8. One relevant CTA
9. Continue learning option

CRM fields and tags

Required

- First name, email, WhatsApp
- Consent timestamp and source

Hidden

- Client / recruit / leader path
- R, I, S and E scores
- Missing letter
- Intent and readiness
- Quiz version and landing variant
- Result CTA clicked
- Assigned owner

Analytics events

- Hero CTA clicked
- Missing-step card selected
- Path selected
- Quiz started
- Question reached
- Quiz completed
- Gate viewed / submitted
- Result shown
- PDF downloaded
- Booking or WhatsApp clicked
- Booking completed

Acceptance test: the visitor receives the promised result immediately, while the correct owner receives the path, scores, consent, source and next-action data.
